

WEST CENTRAL MINNESOTA TOWARD ZERO DEATHS STRATEGIC PLAN

Mission

To move West Central Minnesota toward zero deaths on our roads, in a partnership with area education, enforcement, engineering and emergency services representatives.

Goal 1 – Reduce TZD Fatality and Serious Injuries

To continuously decrease traffic related fatalities and serious injuries in West Central Minnesota from the past **5-year averages** 2013-2017* of 22 fatalities and 79 serious injuries. Note: New injury definitions were introduced in 2016 and may have contributed to a higher reported number of serious injuries.

Objectives

- A. To continuously increase regional seatbelt use rates.

The statewide average **was 92% in 2017**. The regional seat belt rate **was 78.1% in April 2017**. The last survey finding of 78.4%, was in April of 2016.

Goal: to achieve 80% seat belt use compliance by next study.

- B. To examine the characteristics of the unbelted fatalities and serious injuries. Calculation of seat belt use in fatal and serious crashes is possible with existing data.
